

FOR HFMA'S MAP APP

dbtech  SOLUTIONS

BENEFITS:

- ➡ Automatically capture revenue cycle data, then seamlessly transfer to HFMA's MAP App.
- ➡ Eliminate submission errors.
- ➡ Improve the comparative reporting process.
- ➡ Easily adhere to all HFMA planned input modifications.
- ➡ Archive & analyze submitted data.
- ➡ Compatible with MEDITECH, Siemens, Epic, McKesson and more!

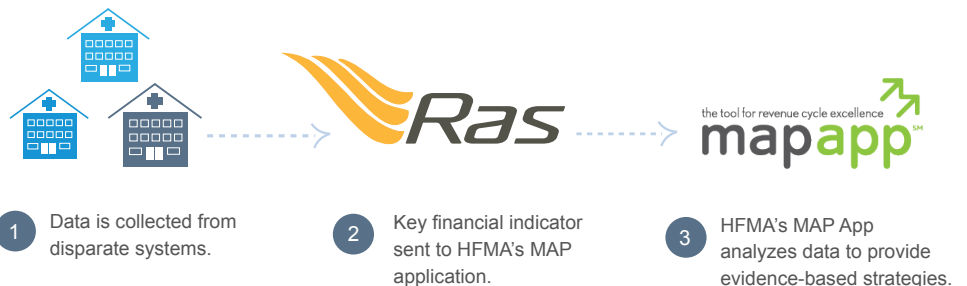

➡ YOUR JOURNEY TO REVENUE CYCLE EXCELLENCE

You've chosen HFMA's MAP App – the tool for revenue cycle excellence – to track your organization's performance at each stage of the revenue cycle and provide evidence-based strategies for improvement. But, how do you get your data into the MAP App?

Ras for HFMA's MAP App lets you leverage years of healthcare revenue cycle and data expertise to automate the process.

➡ HOW IT WORKS

Ras for HFMA's MAP App is a fully-managed solution that makes use of an agile API to write data and key revenue cycle indicators directly to the MAP App.

First, Ras collects data from your disparate systems. Then, financial key performance indicators are transferred directly to the HFMA MAP App.

Because Ras for HFMA's MAP App is a fully-managed solution, as the MAP App changes, you can rest assured that your automated data writing continues without a hitch.

It's that easy. We've done the work so you won't have to.
