- ✓ FAX MANAGEMENT
- ✓ HL7 CONVERSIONS
- ✓ 837 BILL FILE ARCHIVES
- ✓ 835 REMITTANCE CONVERSIONS

Ras monitors both internal and external data sources for new information. This information can be in the form of a report, interface transaction, scanned image, spreadsheet, PDF file or any file type recognizable by Windows. Ras analyzes the inbound document and determines its identity based on rules perfected over 25 years. Once identified the document is encrypted, automated and made available to any users anywhere.

With deep experience servicing the Healthcare industry, and its specific focus on security and privacy, Ras ensures documents are protected and safeguarded through role-based access and pervasive audit logs.

As documents are captured by Ras, a series of Workflow Automations will launch based on your instructions. These workflows save time and money by automating tasks that were previously manual.

Dbtech offers a suite of products designed to address Business critical access to information. These products effectively assist healthcare companies in maximizing corporate revenues by decreasing costs associated with the myriad of paper oriented processes.
