

# eFOLDERS

## DOCUMENT MANAGEMENT FOR ALL WORKFLOWS

eFolders, dbtech's EDM solution, captures and manages content from virtually any source. Documents and metadata are captured, either electronically or via imaging, and automatically integrated, indexed, and linked to the IT applications that support your organization.

Using your existing platforms, eFolders creates and updates electronic folders for the following:

- Patient Financials
- Human Resources
- Physician Credentialing
- Employee Health
- Residency Programs
- Accounts Payable
- Materials Management
- Corporate Donations

eFolders automatically integrates, indexes, and links electronic reports, forms, EDI, and scanned documents, providing an account-centric view that eliminates manual processes. While paper is still an integral part of ongoing business processes, managing sensitive data is a streamlined digital process with dbtech.

## eFOLDERS BENEFITS

eFolders from dbtech empowers you to take full control of your paper documents with a powerful and intuitive set of tools.

- ✔ Minimize IT intervention
- ✔ Automatic indexing of electronic forms including consents, invoices and resumes
- ✔ Controlled access to account specific content throughout your facility
- ✔ Image-enable existing IT platforms using dbtech's eFolders API
- ✔ Create exports of images and data
- ✔ Link content to existing portals or workflows

dbtech offers a suite of products designed to address access to business-critical information. Our products are effective in assisting healthcare organizations to maximize corporate revenues by decreasing costs associated with the myriad of paper-oriented processes.
