5 Ways to Improve
Healthcare Collaboration

Healthcare is a complex and ever-changing industry. For this reason, healthcare providers must collaborate effectively to provide optimal care for patients. It is critical to deliver the tools that make this kind of collaboration more manageable than ever. Continue reading to discover some of the ways to improve your healthcare collaboration with our solutions from dbtech.

01

STREAMLINE COLLABORATION ACROSS DEPARTMENTS & PROCESSES

Rasi, our intelligent document management solution, offers a user-friendly interface for easy sharing and distributing documents between departments. It fosters collaboration among various healthcare departments and ensures critical information is available for healthcare providers.

02

UTILIZE AUTOMATED WORKFLOWS WITH RAS & RASI

Ras Workflow Automation enhances collaboration by streamlining report processing and data management with automated workflows and real-time alerts. Rasi improves efficiency and teamwork in healthcare facilities through better document tracking and faster approval processes.

03

EFFECTIVELY MITIGATE EHR DOWNTIME EVENTS

dbtech's Downtime solution enhances care coordination by increasing efficiency during EHR downtime and improving patient care. It allows nursing staff to access and review vital information from previous shifts and supports the creation of new document types to streamline interdepartmental workflows.

04

DOCUMENT MANAGEMENT THAT ENABLES CONSISTENT WORKFLOWS

dbtech's solutions boost efficiency and coordination by streamlining document management with eFolders for seamless HR exchanges and creating consistent workflows. Rasi's patient registration workflows ensure all necessary documents are collected upfront, reducing billing delays and improving care coordination.

05

ENHANCED COLLABORATION BETWEEN BILLING DEPARTMENTS

Collaboration between billing departments improves with automatic internal and external document sharing, streamlining information exchange. Ras provides a complete audit trail, enabling internal staff to track who accessed data and when.

dbtech's suite of collaborative products provides secure, seamless access to patient documentation and enhances care continuity. Our automated workflows boost coordination and reduce EHR downtime impacts. Contact us today to see how our solutions can elevate collaboration in your healthcare facility.
